Reviews

At first the show was very well liked but was on at the same time as the tv show Friends so not as many people watched it but the ones who did liked it a lot.

The Gilmore Girls fandom got very angry at the seventh album and it was terrible just like the show in general.

Plot

- set in Stars Hollow, Connecticut
- Lorelei has a daughter, Rory when she was 16 and was basically disowned by her parents so she moved to Stars Hollow where she became a maid at the independence inn to make a living and has made her way up to executive manager. She chose never to marry the father and raise Rory as a single mother. The show shows the everyday ups and downs of their lives.

The shows Influence

The Cincinatti Post's Rick Bird hit on some of the keywords:

Gilmore Girls premieres tonight (at 8 on WB, Channel 64) as we are introduced to one of the most witty and sassy mother-daughter buddy shows seen on TV in some time. This free-spirited dramedy is one of the more endearing, engaging shows of the new season

The show was witty and fast paced, Each script for the show was about 75-80 pages long and each page was under a minute of screen time making it clever and people wanted to act as funny as the characters in the show.

Beyond its time...

Gilmore Girls as a show has hundreds of obscure and popular references throughout. This makes it relatable to the masses and the audience enjoys when there are references to other shows or movies outside of what is deemed “popular.” Lorelei and Rory in the show watch many old movies and shows so when they make these references, many other characters in the show don't know what they are talking about but it's funny to the audience because they understand their jokes.
