Industrialization & Immigration: Where Do You Stand?

1. Do you think human nature is basically good or bad? Explain.

2. Who do you think should own businesses/factories - the government or private individuals? Why?

3. Do you think workers could and should run factories without bosses?

4. Do you think people's incomes should be roughly equal, even if some people have different abilities, or do you think big differences in income should be allowed? (FYI: Currently the top 10% of wage earners make more than 50% of the nation's wealth each year. Do you feel this is right?)

5. Do you think everyone, rich or poor, should have the <u>right</u> to decent educational opportunities, food, housing, a job, and medical care?

6.	Do you feel that competition in business is good for consumers? How so?
7.	What do you think? Business is just like nature: the strongest are the ones who will thrive and who deserve to survive. Big businesses like Wal-Mart, Target, Apple deserve to survive while smaller, locally owned businesses are weak and therefore destined to fail.
8.	Do you think poor people are poor because they are lazy and don't make sufficient effort?
9.	Do you think that wealth is a reflection of a person's abilities and effort in life?
10.	Do you think the wealthy have any responsibility to give back to society and to help those who are less well-off?
