

Industrialization

Source: Udo J. Keppler, *Puck*, September 7, 1904 (adapted)

Directions: You have just inherited a large sum of money from a wealthy family member. With this newfound wealth, you hope to break into the oil business and ultimately take control of the industry.

What do you need to do to accomplish this feat? **FIRST** make a list of the items or tasks that will have to be accomplished in order to start and, if lucky, complete this enormous venture. **THEN** organize the list into a step by step flow-chart which details your plan to conquer the world. Also indicate how you will accomplish some of your challenges (i.e., if there is a business competing with you for business, how might you overcome this challenge?)

When everyone is done, you will share your plans with the class and we will evaluate which group has come up with a plan that is most likely to be successful.
